

TECHNICAL DATA SHEET

# NRF-6200

## High Elongation ETFE Release Film

Northern<sup>®</sup> Composites

**DESCRIPTION:**

NRF-6200 is a high elongation release film suitable for cure cycles up to 450°F (232°C). It is compatible with most commercial resins and releases easily.

**APPLICATION:**

NRF-6200 exhibits both high elongation and excellent toughness. The red and blue films are easily visible against the cured part and the color will not transfer to the composite.

**TECHNICAL DATA:**

	TEST METHOD	TYPICAL VALUES
Color		Red, Blue, White
Elongation (min)	ASTM D-882	300%
Max. Use Temperature		450°F
Continuous Use Temperature		350°F

The above values are "Typical Values" which have a nominal range about them and are not intended for specification purposes.

**AVAILABILITY:**

Roll sizes: 60" x .001 x 417'  
50" x .001 x 500'

Perforations: Call for availability
